# MAYUR KOLI

AI Engineer | Full Stack Developer

Pune, Maharashtra, India | +91-9022904151 | kolimohit9595@gmail.com | github.com/Mayurkoli8 | LinkedIn | mayurkoli.me

## PROFESSIONAL SUMMARY

Computer Engineering graduate with hands-on experience designing, building, and shipping full-stack and backend software in Agile teams. Have taken features from requirements through component-level design, coding, unit testing, and production deployment including debugging live issues reported by real clients and shipping fixes under time pressure. Comfortable across the stack: Python/FastAPI and Node.js on the backend, Next.js/React on the front end, with deployment experience on Firebase, Render, GCP, and AWS. Quick to pick up new tools and codebases with minimal ramp-up.

## TECHNICAL SKILLS

**Backend Development:** Python, FastAPI, Node.js, REST API Design, JSON, Component-Level Design, Unit Testing

**Frontend Development:** Next.js, React, JavaScript, Tailwind CSS

**Languages:** Python, Java, JavaScript, C++

**Cloud & DevOps:** Firebase, GCP, AWS, Render, Git/GitHub, Linux, CI/CD-Style Deployment Pipelines

**Practices:** Agile/Scrum, Debugging & Troubleshooting, Requirement Analysis, Stakeholder Collaboration

**AI & Data (additional):** LangChain, FAISS, Ollama, Prompt Engineering, MySQL, Streamlit

## PROFESSIONAL EXPERIENCE

**Software Developer / AI Engineer (Tech Lead) — SparkOS** *Feb 2026 – Present*

- Design and build backend automation workflows (n8n) and AI-integrated features for real estate and business clients, working in two-week Agile sprints with the founding team.
- Debug and resolve customer-reported issues in live production systems, tracing failures through webhook logs and shipping fixes with minimal downtime.
- Design, code, and unit test API integrations (GoHighLevel CRM, WhatsApp) at the component level before wiring them into client-facing workflows.
- Deploy changes through git-based pipelines to Linux-hosted production servers and monitor post-release stability.
- Work directly with stakeholders to translate business requirements into working automation logic.

**Technology Consultant — SEED U (seedu.io)** *Sep 2026 – Present*

- Developed and integrated AI chatbot solutions using Python and Ollama to improve agricultural knowledge accessibility for farmers.
- Integrated conversational AI with Telegram for interactive user experiences.
- Evaluated agricultural speech datasets for compatibility with the AI pipeline.
- Deployed and tested AI solutions in the client's environment.
- Contributed to technical architecture, solution design, integration, and end-to-end implementation.

*Stack: Python, Ollama, LLMs, Telegram Bot API, AI Integration*

**Software Intern — Zensar ESD** *Jan 2025 – Feb 2025*

- Designed and unit-tested Python components with database integration as part of enterprise application delivery, under senior engineer mentorship.
- Worked within an Agile team structure, joining sprint planning and stand-ups to align on stakeholder requirements.
- Got hands-on exposure to CI-driven build and test pipelines, and to debugging issues surfaced during integration testing.

**RPA & Web Development Intern — Rajavi Technologies Pvt. Ltd., Pune** *Jul 2021 – Sep 2021*

- Contributed to full-stack web development and automation tasks within enterprise workflows, fixing bugs flagged during internal testing.

## PROJECTS

**FolioPort — Resume-to-Portfolio SaaS Platform** *folioport.live*

Full-stack SaaS product that turns a resume into a live portfolio website; designed, built, and deployed independently with real paying users.

- Designed and unit-tested backend API routes (auth, payments, portfolio generation) before integrating them with the Next.js front end.
- Built and shipped the front-end UI in Next.js/Tailwind CSS, including the public portfolio templates and live user dashboard.
- Deployed through Firebase, debugging issues reported by early users and pushing fixes through git-triggered redeploys.

*Stack: Next.js, Payments API, Firebase, Tailwind CSS*

**Mentesa — No-Code Multi-Bot Generative AI Platform** *mentesa.mayurkoli.me*

SaaS platform for building LLM agents with persistent memory and document-based RAG (FAISS); published research at IJSREM 2025.

- Designed the backend retrieval pipeline (Python, FastAPI, FAISS) and unit-tested core retrieval and memory components.
- Built the multi-bot admin dashboard in Streamlit and iterated on it based on user feedback.

*Stack: Python, LangChain, FAISS, Firebase, Gemini API, Streamlit*

**ChatDouble — AI Persona Mimicry Chatbot** *chat-double.vercel.app*

Chatbot platform with FAISS-based contextual retrieval and personality-mirroring, built on the Gemini API.

- Designed and unit-tested the retrieval and response-generation components, then wired them into a Streamlit front end.
- 500+ real users.

*Stack: Python, Gemini API, FAISS, Streamlit*

## EDUCATION

**Bachelor of Engineering — Computer Engineering, CGPA: 8.5 / 10** *2023 – 2026*

Savitribai Phule Pune University (Zeal College of Engineering & Research, Pune)

**Diploma — Computer Engineering, 86.06%** *2020 – 2023*

Maharashtra State Board of Technical Education, Nashik

## CERTIFICATIONS

- Python Employability Skill Development Programme — Rubicon & Deutsche Bank (Mar 2025)
- Machine Learning with AI using Python — Quantum Learning (Sep 2022)

## ACHIEVEMENTS

- 1st Prize — Innoverse 2.0 (2025), national-level inter-college innovation competition, for an AI-based solution.
- 1st Prize — NexAI Coding Competition (2024 & 2025), back-to-back wins in AI/ML problem-solving.
